The Amalfi Coast Road Trip: Route, Stops, Parking Reality & What to Skip

By Elena Moretti · 28 August 2026 · 9 min read

SS163 · AMALFI COAST

Rental cars are banned from the coast road on alternating days through the summer. The *targhe alterne* system has run since 2022, it applies specifically to hire cars, and people still arrive not knowing about it.

The Quick Answer

On odd-numbered dates, odd-numbered plates are barred; on even dates, even plates are barred. Roughly June–September, 10:00–18:00, along the full SS163 from Vietri sul Mare to Positano. Parking is the real constraint, not the driving.

AD PLACEMENT

970 × 250
BILLBOARD · DESKTOP

For most people the ferry is the better answer between May and September.

UNIT

In-article display

SIZES ACCEPTED

970×250, 728×90 desktop · 300×250 mobile

POSITION

After section 2 of every guide, and again at 60% scroll depth

DELIVERY

Viewable-on-scroll, lazy-loaded, one unit per viewport

WHY IT WORKS HERE

The reader arrived from a search for a specific destination. By this scroll depth they have read the constraint that shapes the trip and are deciding how to book around it.

“Where to Stay” native module

A sponsored card inside the accommodation section of each destination guide. The highest-intent unit on the site — the destination is already chosen.

destination.com

UNIT

"Where to Stay" native module

FORMAT

Responsive native card, 3 slots

POSITION

Inside the accommodation section of each destination guide

LABELLING

Marked “Sponsored” on the card, per FTC disclosure requirements. Editorial cards either side are unpaid.

WHY IT WORKS HERE

Highest-intent unit — reader has chosen a destination and is choosing lodging. The unit sits in the decision itself rather than beside it.

Mobile in-feed

The majority of reading happens on a phone. The mobile unit is a single 300 × 250 in the article flow — one unit per viewport, never a stack.

destination.com

READING BEHAVIOUR

Mobile share of sessions and engaged time are on the audience slides. The unit is lazy-loaded below the fold and renders only when it enters the viewport, so served impressions and viewable impressions stay close together.

No interstitials, no anchor units, no auto-refresh. One in-view unit at a time.

SIZE

300 × 250

POSITION

After section 2 of every guide, and again at 60% scroll depth

DENSITY

Viewable-on-scroll, lazy-loaded, one unit per viewport

SIDEBAR (DESKTOP ONLY)

A 300 × 600 sticky rail unit runs alongside the article body on desktop, holding share of voice for the length of the read.

Newsletter sponsorship

One sponsor per issue, placed above the first editorial item. No competing advertisers in the same send.

Interest and income segments

How the audience maps onto the affinity and in-market segments a travel buyer plans against.

● ESTIMATES · PENDING VERIFICATION

destination.com

AFFINITY & IN-MARKET SEGMENTS — SHARE OF AUDIENCE

HOUSEHOLD INCOME DECILE (US)

Segment shares are modelled against GA4's Affinity and In-market taxonomy and overlap by design — a reader can sit in several at once, so these do not sum to 100%. Income bands follow GA4's US household-income deciles. Both are estimates pending verification.

Placement specifications

Every unit available, in one table.

UNIT	SIZES / FORMAT	POSITION	NOTES
In-article display	970×250, 728×90 desktop · 300×250 mobile	After section 2 of every guide, and again at 60% scroll depth	Viewable-on-scroll, lazy-loaded, one unit per viewport
"Where to Stay" native module	Responsive native card, 3 slots	Inside the accommodation section of each destination guide	Highest-intent unit — reader has chosen a destination and is choosing lodging
Sticky sidebar	300×600, 300×250	Right rail, desktop only, sticky through the article body	Persistent share of voice for the length of the read
Newsletter sponsorship	600×200 banner + 40 words + CTA link	Top of issue, above the first editorial item	Single sponsor per issue — no competing advertisers

TECHNICAL

Standard IAB sizes, third-party tags accepted. Viewability and delivery reporting shared at whatever cadence suits you.

BRAND SAFETY

Editorial travel content only. No auto-refresh, no interstitials, one in-view unit per viewport.
